

Landscaper Series

Hydroseeding Systems

L10

Easy Lawn's Landscaper Series Hydroseeding Units are smaller capacity units for patching with enough performance to do a small lawn when necessary. These units are designed for the cemetery, nursery, or small contractor who does occasional seeding, but still needs professional performance. The L10 offers industry leading performance for this price range, operating at 40 psi while maintaining full agitation. These units come standard with Easy Lawn's Liquid Recirculation Jet Agitation System that assures fast mixing, trouble free operation, and easy clean out. They will fit into the bed of a small or standard pickup, and with the fork pockets they are easy to pick up and place in the bed with a fork lift or skid steer with forks. The L10 has enough pressure to push the slurry through 100' of 1 1/4" hose. The units come standard with two hose hooks to hold the hose without kinking. The exclusive easy change nozzle system makes it fast and easy to change the nozzles at the end of the hose. Just unscrew the nozzle by hand and screw on the new nozzle, no tools required. The Easy Lawn gun assembly is compact and light weight to reduce operator fatigue.

Specifications:

Engine:	2H	4.8 HP Honda Gas
Tank Size:		100 Gallon Polyethylene
Fuel Capacity:	2H	1.9 Quarts (US)
Pump:	2H	2"x2" Centrifugal Pump 14gpm/52psi
Pump Drive:		Direct Drive
Agitation:		Jet Agitation
Fillwell:		10"
Hose:		2 - 50' Sections of 1 1/2" Collapsible Hose
Nozzles:		1 Wide Fan, 1 Narrow Fan, and 1 Straight
Max Material:		40 lbs. Fiber Mulch
Material Type:		Paper Fiber
Empty Weight:		275 lbs.
Full Weight:		1,250 lbs.
Length:	Skid	4'8"
Width:	Skid	3'10"
Height:	Skid	2'11"
Estimated Coverage:		1,300 sq. ft.
